# GRANGER POND

Denmark Twp., Oxford Co.  
U.S.G.S. Hiram, Me. (7.5')

## Fishes

Largemouth bass  
Yellow perch  
Chain pickerel  
Minnows

White sucker  
Hornpout (bullhead)  
Pumpkinseed sunfish  
American eel

## Physical Characteristics

Area - 126 acres

Maximum depth - 28 feet

Temperatures:

Surface - 75°F

27 feet - 65°F

Principal fisheries: Largemouth bass, yellow perch, chain pickerel

Granger Pond is located southwest of Bridgton, and its lightly developed shorelines offer a peaceful angling experience. This pond is best suited for warmwater fisheries management due to a lack of suitable water quality during the summer months, and heavy competition from warmwater species.

Bass, perch, and pickerel offer a variety of angling opportunity. However, the majority of bass are of small size with few larger bass being caught.

A traditional access site for canoes and car-top boats is located at the southern tip of the pond.

Surveyed - August 1938
